Black Kabuli® Chickpea

Order number of 16 oz. packas. This heirloom chickpea boasts a distinctive, charcoal black skin, which is high in anthocyanins, a powerful antioxidant. It is a trademarked variety that, as far as we know, is truly a one-of-a-kind chickpea and is available only from Timeless. It has a fuller, earthier flavor than standard chickpeas (garbanzo beans). Its skin is also thicker and tougher. It's best to soak the Black Kabuli overnight to reduce cooking time, which will be more than 1 hour if not soaked. The Black Kabuli always catches the imagination of chefs, who like its distinctive presentation in salads and soups. It will bleed a bit during cooking, so it's best to cook it alone and add it to recipes after its cooked. For an exciting "black and tan" effect in any chickpea soup or salad, substitute the Black Kabuli for 1/2 the garbanzo beans (cooking each in its own pan).
